Meet with us in the Windy City!

The Stata Conference is a unique opportunity to hear from Stata experts in the top of their field, as well as Stata's own researchers and developers. Open to users of all disciplines, the Stata Conference has something for everyone. Join us for this chance to learn from and network with Stata users from all over the world.

Call for presentations

All users are encouraged to submit abstracts, from which a subset will be chosen for either a 15-minute or a 25-minute presentation. Any topic related to Stata or relevant to Stata users is appropriate, including the following:

- New community-contributed commands for model estimation, graphing, data management, results reporting, or other purposes
- New approaches for using Stata to manage or analyze data, for programming Stata or Mata, or for using Stata together with other software or frameworks
- Innovative use or evaluations of existing Stata commands
- New analytic methods of particular relevance to Stata users
- Case studies of using Stata for specific applications or in specific disciplines or settings
- Methods and resources for teaching statistics with Stata or for teaching the use of Stata
- Comparisons of Stata with other software

For full submission guidelines, visit stata.com/chicago19.
