
Reference 17 (Smith et al) in the above paper was retracted and should not have been included within the reference list of the final publication. Reference 2 (Aune and Powers) describes an “extreme conditioning program” gym that the above paper incorrectly refers to as a CrossFit program. Neither reference was central to this study, and, therefore, these items do not impact the overall conclusions of the study. Additionally, reference 4 should have been correctly identified as: Burns J, Keenan AM, Redmond AC. Factors associated with triathlon-related overuse injuries. J Orthop Sports Phys Ther. 2003;33(4):177-184.
