As the number of migrants, refugees, and asylum seekers across the globe has grown, intense debate has emerged about how long and how well these groups integrate into host countries. This integration is complex, and most prior studies have captured only parts of the process.

This volume of **The ANNALS** sheds light on this complexity, collating studies on different forms of integration and highlighting the ways in which local policies and institutions can enhance integration outcomes. Considering the varied integration timelines of refugee and immigrant groups, this volume bolsters our understanding of the lived experiences of those seeking refuge and illuminates the role that local action can play in successful integration.
