

CALL FOR PAPERS

“Indo-Pacific: A New Paradigm”

Journal of Asian Economic Integration

As the focus of rapid economic growth has moved from the Pacific shores of Asia toward South and Southeast Asia, the Gulf region and East and South Africa, it has become necessary to revisit older definitions of the region. Much of the world's trade in goods and energy products flow across sea lanes in the Indian and Pacific Oceans. These are today the world's super-highways on which wealth and prosperity is created. The Indo-Pacific concept includes both the new centres of rapid economic growth and the increasingly maritime-first nature of modern economics. It gives primacy to the interconnected nature of the oceanic domain, with softer borders, thus giving clear expression to the changing geo-economic realities of this geographic expanse. A free, open, inclusive and rules-based Indo-Pacific with freedom of navigation and peaceful settlement of disputes lie at the centre of the Indo-Pacific concept. With the focus on various facets of the vast domain of Indo-Pacific, *Journal of Asian Economic Integration*, published by SAGE Publications, is inviting contributions to a **Special Issue** on “**Indo-Pacific: A New Paradigm**” from scholars, economic commentators, policymakers and officials, and from both the private and public sectors.
