Care at home is rendered by multiple health care providers in a systemized, organized and coordinated fashion. It involves physicians, nurses, social workers, rehabilitation therapists, nutritionists, psychologists, and other specialty that touches the patient at home. Home Health Care Management & Practice focuses on all aspects of this care.

Topics Covered May Include:
- Organization structure as it impacts the delivery of care
- Education of the caregivers
- Measurement of the quality of care
- Disease prevention and its management
- Pharmacology issues
- Diversity
- And other topics directly applicable to the delivery of care at home

Accepted Manuscripts Are:
- Original articles
- Review articles
- Case reports
- Commentaries
- Opinions
- Editorials
- Ongoing series
