Open Science Badges available:

Open Data:

All data necessary to reproduce the reported results that are digitally shareable are made publicly available. Information necessary for replication (e.g., codebooks or metadata) must be included.

Open Materials:

All materials necessary to reproduce the reported results that are digitally shareable, along with descriptions of non-digital materials necessary for replication, are made publicly available.

Preregistered:

At least one study's design has been preregistered with descriptions of (a) the research design and study materials, including the planned sample size; (b) the motivating research question or hypothesis; (c) the outcome variable(s); and (d) the predictor variables, including controls, covariates, and independent variables. Results must be fully disclosed. As long as they are distinguished from other results in the article, results from analyses that were not preregistered may be reported in the article.

Preregistered+Analysis Plan:

At least one study's design has been preregistered along with an analysis plan for the research — and results are recorded according to that plan.

Note that it may not be possible to preregister a study or to share data and materials. Applying for open science badges is optional.
