INFORMATION AND GUIDELINES FOR SUBMISSIONS

HERD features original manuscripts on the relationships among environmental design, health, and organizational, provider, and patient outcomes. As a translational journal linking research to practice, HERD features rigorous research from academic sources and applied research from practice. Papers on research methods, theory, completed research studies, opinion papers, systematic reviews of literature, meta-analyses, case studies, post-occupancy evaluations, and critical reviews of new books are accepted. Letters to the editors and responses commenting on articles or research and theory are invited.

MANUSCRIPT REVIEW

HERD adheres to a rigorous double-blind peer review policy in which the identity of both the reviewer and author are always concealed from both parties. Manuscript content is assessed for relevance, accuracy, and usefulness to those in healthcare, design, and research settings and for fit with the HERD Mission. Manuscripts will be blind reviewed by at least two peer reviewers. Authors will receive a summary of reviewer comments and the editors’ recommendation to accept, revise (minor or major) or reject. Articles with a recommendation for revision require the author(s) to provide a summary of changes. The editors’ final recommendation to accept or reject will be forwarded to the corresponding author. If your manuscript is accepted for publication, SAGE will require you to complete a Contributor Agreement Form online.

AUTHOR(S) RESPONSIBILITY

As part of the submission process you will be required to warrant that you are submitting your original work, that you have the rights in the work, and that you have obtained and can supply all necessary permissions for the reproduction of any copyright works not owned by you, that you are submitting the work for first publication in the Journal and that it is not being considered for publication elsewhere and has not already been published elsewhere. Please see our guidelines on prior publication and note that HERD may accept submissions of papers that have been posted on pre-print servers; please alert the Editorial Office when submitting (contact details are at the end of these guidelines) and include the DOI for the preprint in the designated field in the manuscript submission system. Authors should not post an updated version of their paper on the preprint server while it is being peer reviewed for possible publication in the journal. If the article is accepted for publication, the author may re-use their work according to the journal's author archiving policy. If your paper is accepted, you must include a link on your preprint to the final version of your paper.

Authors are responsible for obtaining written permission to adapt or reprint all material that they did not create themselves or which has been previously published. This includes all material for which the author does not hold the copyright, including art (Photos, Figures, and Tables) and significant textual quotations (exceeding 100 words). Please note that this permission covers reproduction in HERD in all current and future formats.

Carefully check that all those whose work contributed to the paper are acknowledged as contributing authors. The list of authors should include all those who can legitimately claim authorship such as those who:

- Made a substantial contribution to the concept and design, acquisition of data or analysis and interpretation of data,
• Drafted the article or revised it critically for important intellectual content,
• Approved the version to be published.

All contributors who do not meet the criteria for authorship should be listed in an Acknowledgements section. Examples of those who might be acknowledged include a person who provided purely technical help, or a department chair who provided only general support. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship.

Individuals who provided writing assistance, e.g. from a specialist communications company, do not qualify as authors and so should be included in the Acknowledgements section. Authors must disclose any writing assistance – including the individual’s name, company and level of input – and identify the entity that paid for this assistance”). It is not necessary to disclose use of language polishing services.

Please refer to the International Committee of Medical Journal Editors (ICMJE) authorship guidelines for more information on authorship.

HERD requires all authors to acknowledge their funding in a consistent fashion under a separate heading. Please visit the Funding Acknowledgements page on the SAGE Journal Author Gateway to confirm the format of the acknowledgment text in the event of funding, or state that: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

The author(s) name(s) must not appear anywhere in the abstract or manuscript main text to ensure a fully blind review process.

TYPES OF ARTICLES

HERD accepts the following types of articles:

Research papers: Research studies can be qualitative, quantitative, or mixed methodology. The following sections are recommended: introduction, significance, aim or purpose, conceptual or theoretical framework guiding the study, review of the literature, methodology (study design, setting, sample, instruments or surveys (questions) used, data analysis methods, findings or results, limitations, conclusions, recommendations for future results, and implications for practice.

All research articles must include a statement in the text about approval for the study from an Institutional Review Board (IRB), administrative approval, or an ethical committee. Authors should indicate methods used for protecting human subjects’ rights or methods of protecting animals. Please review the section below Protecting Research Subjects. A hard copy or scanned file of the IRB approval should be submitted as a separate file when submitting your manuscript.

Non-research articles: Non-research papers include scholarly white papers or manuscripts about healthcare or design innovations, a review of theoretical or conceptual models explaining relationships among variables of interest; specific design challenges and possible solutions to improve patient, provider or organizational outcomes; or opinion papers on a specific healthcare design topic The paper should include references to support the author’s perspectives or opinions and recommendations and/or implications for practice.

Meta-analysis or Meta-synthesis: This type of manuscript synthesizes studies pertinent to the topic and has a summarizing conclusion with implications for practice.
**Case studies or post-occupancy evaluations:** Case studies describe and evaluate a particular design method or feature(s) in a healthcare setting. Case studies include the positive and negative experiences or findings related to the design process or final solution. Post-occupancy evaluations (POE) should be third-party evaluations of the strengths or weaknesses of completed/built facilities intended to improve the design of future facilities. The actual organization or site of the case study and POE must not be stated in the text for blind review.

**OTHER TYPES OF ARTICLES** (these submissions are not submitted through SAGE Track and are sent as an email attachment to the editors or editorial assistant):

**Book reviews:** Book reviews present a scholarly review of a book and your impression of its value to practitioners. Please provide a photo of the cover. Please contact one of the editors for your interest in submitting a book review.

**Methodology papers:** Methodology papers enhance readers’ knowledge of a subject by describing “how,” or the steps of a process. Methodology papers can focus on qualitative or quantitative research methods, instrument or survey development to measure design outcomes, design processes, translating existing research into practice for evidence-based design, or disseminating new knowledge from a completed project. Please contact one of the editors for your interest in submitting a Methodology paper.

**Letters to the Editors:** Please send all Letters to the Editors to the Editorial Assistant (editors@herdjournal.com).

**MANUSCRIPT PREPARATION FOR STYLE AND FORMAT**

All manuscripts must adhere to the style and format described in the *Publication Manual of the American Psychological Association* (APA), *Seventh Edition* (2010) and must be submitted in Microsoft (MS) WORD®. We recommend you use spell and grammar check under the “Review” tab in MS WORD before submitting your article on Scholar One. Manuscripts not meeting the APA guidelines or having numerous spelling and grammar faults will be sent back to the author(s) for correction prior to being sent out to a panel of reviewers.

*Manuscript Text* must be double-spaced in an 8½ x 11-inch format with 1-inch margins in Times New Roman 12-point font. The *manuscript text and references should not exceed 20 pages*. The author’s name or institution must be deleted from the text for peer review purposes. All pages in the manuscript should be numbered consecutively (In WORD, insert, page number). Text in the manuscript should contain pull-out quotes, highlighted in bold.

*References* in APA style are placed immediately after the body of the manuscript. Authors who use EndNote or other type of referencing system should convert the final copy of the paper to a Word document without the EndNote Codes (Convert Citations and Bibliography drop down menu and choose plain text).

One file should be saved and submitted that includes only the text and references as one complete file.

**Other Required Files:**

*Title Page*
The Title Page should include the following information:

- Title of article;
- Name, degrees, job title or position, and affiliation of each author in the order of authorship;
• Full contact details for the corresponding author including email, mailing address and telephone numbers;
• Acknowledgment of funding or other support (financial and otherwise) and acknowledgement of Conflict of Interest;
• Keywords: Authors are required to submit at least five (5) keywords for their article. Suggested keywords can be found on the SAGE Track website (https://mc.manuscriptcentral.com/herd).

Abstract (maximum 250 words)
An abstract is required summarizing the article with headings including: (1) objectives, purpose or aim, (2) background, (3) methods, (4) results, and (5) conclusions.

Executive Summary of Key Concepts (maximum 200 words)
The Executive Summary should be a non-technical or non-academic narrative preview of the article, encouraging the design or healthcare practitioner to read the full article.

Implications for Practice
Bulleted list (approximately 3-5 bullet points) on how the information in the article can be used in practice.

Tables and Figures:

Tables are WORD documents of data or summarizing information in a table format rather than in full text in the manuscript. Tables are prepared in a 10-point sans serif font (Calibri or Arial), and each table saved as a separate file.

Figures can be artwork, illustrations, drawings, or actual photographs labeled as Figure # and saved as a separate file. Figures can be submitted in Microsoft WORD or Powerpoint format, as a pdf file, or as a .jpg or .tif file for photos.

For guidance on the preparation of illustrations, pictures and graphs in electronic format, please visit SAGE’s Manuscript Submission Guidelines. Figures supplied in color will appear in color online regardless of whether or not these illustrations are reproduced in color in the printed version. For specifically requested color reproduction in print, you will receive information regarding the costs from SAGE after receipt of your accepted article.

Photo License Agreements and Permission To Reproduce:

Photos/Illustrations
Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere. Authors must also obtain written permission to reproduce material that has appeared in another publication, including the author’s own writings that may have been previously published. If you wish to use any or all of that content in your HERD submission, you must obtain written permission to reproduce those excerpts.

All relevant forms should be submitted concurrent with initial manuscript submission. No article can be published unless all pertinent permissions have been secured.

Supplemental Material
This journal is able to host additional materials online (e.g., datasets, podcasts, videos, images, etc.) alongside the full-text of the article. These will be subjected to peer review alongside the article. For more information please refer to our guidelines on submitting supplemental files, which can be found within our Manuscript Submission Guidelines page.
OTHER IMPORTANT INFORMATION

English Language Editing Services
Authors seeking assistance with English language editing, translation, or figure and manuscript formatting to fit the journal’s specifications should consider using SAGE Language Services. Visit SAGE Language Services for further information.

Funding
Authors must acknowledge their funding for a study on the title page. Please visit the Funding Acknowledgements page on the SAGE Journal Author Gateway to confirm the format of the acknowledgment text in the event of funding, or state: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

Notice of Compliance With NIH Grants And Contracts Policy
In April 2008, a federal law was passed mandating that all articles funded by the National Institutes of Health (NIH) be submitted to PubMed Central within 12 months of publication. It remains the responsibility of the author(s) to fulfill this legal obligation. For information on how to do this, please see the NIH Policy on Public Access at http://publicaccess.nih.gov. If your study or manuscript was funded by NIH, please mention the NIH award and grant number in an acknowledgment.

Publication Ethics
SAGE is committed to upholding the integrity of the academic record. We encourage authors to refer to the Committee on Publication Ethics’ International Standards for Authors and view the Publication Ethics page on the SAGE Author Gateway.

Plagiarism
HERD and SAGE take issues of copyright infringement, plagiarism, or other breaches of best practice in publication very seriously. We seek to protect the rights of our authors and we always investigate claims of plagiarism or misuse of articles published in the journal. Equally, we seek to protect the reputation of the journal against malpractice. Submitted articles may be checked using duplication-checking software. Where an article is found to have plagiarized other work or included third-party copyright material without permission or with insufficient acknowledgement, or where authorship of the article is contested, we reserve the right to take action including, but not limited to: (1) publishing an erratum or corrigendum (correction); (2) retracting the article (removing it from the journal); (3) taking up the matter with the head of department or dean of the author’s institution and/or relevant academic bodies or societies; (4) banning the author from publication in HERD or all SAGE journals, or (5) appropriate legal action.

Open Access and Author Archiving
HERD offers optional open access publishing via the SAGE Choice program. For more information please visit the SAGE Choice website. For information on funding body compliance, and depositing your article in repositories, please visit SAGE Publishing Policies on our Journal Author Gateway.

For further information including guidance on fair dealing for criticism and review, please visit our Frequently Asked Questions on the SAGE Journal Author Gateway.

Conflicts of Interest
SAGE requires a declaration of conflicting interests from all authors. Please ensure that a ‘Declaration of Conflicting Interests’ statement is included at the end of your manuscript, after any acknowledgements, and prior to the references. If no conflict exists, please state that ‘The Author(s) declare(s) that there is no conflict of interest’. For guidance on conflict of interest statements, please see the ICMJE recommendations here.
**Reporting Guidelines**

The relevant [EQUATOR Network](https://www.equator-network.org) reporting guidelines should be followed depending on the type of study. For example, all randomized controlled trials submitted for publication should include a completed [CONSORT](https://www.consort-statement.org) flow chart as a cited figure and the completed CONSORT checklist should be uploaded with your submission as a supplementary file. Systematic reviews and meta-analyses should include the completed [PRISMA](https://www.prisma-statement.org) flow chart as a cited figure and the completed PRISMA checklist should be uploaded with your submission as a supplementary file. The [EQUATOR wizard](https://www.equator-network.org/wizard/) can help you identify the appropriate guideline.

Other resources can be found at [NLM’s Research Reporting Guidelines and Initiatives](https://www.nlm.nih.gov/pubs/publist_r.html).

**Contributor’s Publishing Agreement**

Before publication, SAGE requires the author, as the rights holder, to sign a Journal Contributor’s Publishing Agreement. SAGE’s Journal Contributor’s Publishing Agreement is an exclusive license agreement which means the author retains copyright in the work, but grants SAGE the sole and exclusive right and license to publish for the full legal term of copyright. Exceptions may exist where an assignment of copyright is required or preferred by a proprietor other than SAGE. In this case copyright in the work will be assigned from the author to the society. For more information please visit our [Frequently Asked Questions](https://www.sagepub.com/frequently-asked-questions) on the SAGE Journal Author Gateway.

**Protecting Human Subjects**

Medical research involving human subjects must be conducted according to the [World Medical Association Declaration of Helsinki](https://www.wma.net/en/30publications/10policies/b3/).

Submitted manuscripts should conform to the [ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals](https://www.icmje.org), and all papers reporting animal and/or human studies must state in the Methods section that the relevant Ethics Committee or Institutional Review Board provided (or waived) approval. Please ensure that you have provided the full name and institution of the review committee, in addition to the approval number.

For research articles, authors are also required to state in the methods section whether participants provided informed consent and whether the consent was written or verbal.

Information on informed consent to report individual cases or case series should be included in the manuscript text. A statement is required regarding whether written informed consent for patient information and images to be published was provided by the patient(s) or a legally authorized representative. Please do not submit the patient’s actual written informed consent with your article, as this in itself breaches the patient’s confidentiality. The Journal requests that you confirm to us, in writing, that you have obtained written informed consent but the written consent itself should be held by the authors/investigators themselves, for example in a patient’s hospital record. The confirmatory letter may be uploaded with your submission as a separate file.

Please also refer to the [ICMJE Recommendations for the Protection of Research Participants](https://www.icmje.org/recommendations/browse/ethics-standards/protected-research-participants.html).

Identifying details should be omitted if they are not essential. Complete anonymity is difficult to achieve; however, informed consent should be obtained if there is any doubt. For example, masking the eye region in photographs of patients is inadequate protection of anonymity. If identifying characteristics are altered to protect anonymity, such as in genetic pedigrees, authors should provide assurance that alterations do not distort scientific meaning and editors should so note. The informed consent should be indicated in the published article.
Research Data
At SAGE we are committed to facilitating openness, transparency and reproducibility of research. **HERD expects** authors to share their research data in a suitable public repository. This is subject to ethical considerations and in such cases the journal editor may grant an exception and authors should contact the journal editorial office. Authors are also required to include a data accessibility statement in their manuscript file, indicating if data is present or absent, and to follow data citation principles. For more information please visit the SAGE Author Gateway, which includes information about SAGE’s partnership with the data repository Figshare.

**SUBMISSION CHECKLIST**

Before electronically submitting your manuscript to **HERD** SAGE Track, please check the following:

- Is the manuscript and references (20 pages or less) prepared in MS Word and saved in a separate file with a .doc or .docx file extension?
- Do your manuscript and references conform to APA style (7th Edition)?
- Are the manuscript pages numbered consecutively?
- Is the manuscript text double-spaced in 12-point Times New Roman with 1-inch margins?
- Does your text manuscript highlight pull-out quotes in bold?
- Have you eliminated all information identifying the author(s) and/or study (e.g., facility name and location) from all pages to facilitate the blind review process? This information may be added after peer review.
- Have you provided the following in separate Word files: Title Page, Executive Summary of Key Concepts (200 word max), Abstract (250 word max), Tables, Figures, and bulleted list of Implications for Practice?
- Is your Title Page in the correct format and include: acknowledgment of funding or other support; disclosure of any conflicts of interest; and five or more keywords?
- Are Tables or other illustrative text materials in a 10-point sans serif font (Calibri or Arial), and ready to be submitted as separate Word files?
- Are Figures (artwork, photographs, or other images) prepared in separate, high-resolution (300dpi) files in .TIF or .JPEG format?
- Have you supplied all written permissions to reprint copyrighted material (more than 100 words) that you quote in the text?
- Have you supplied written permission to reproduce or adapt any illustrations or photos that come from another source? Have you identified photographers (note that names in captions should be omitted for peer review but can be added after the article is accepted) and supplied model releases from identifiable people in photos?
- Have you disclosed potential conflicts of interest by submitting the International Committee of Medical Journal Editors’ Disclosure Form?
- Have you uploaded your IRB or Administrative approval or other documentation of protection of human subjects?

**ELECTRONIC MANUSCRIPT SUBMISSION**
**HERD** is hosted on SAGE Track, a web based online submission and peer review system powered by ScholarOne™ Manuscripts. Visit [https://mc.manuscriptcentral.com/berd](https://mc.manuscriptcentral.com/berd) to log in and submit your article online.

Please create your own account as instructed by SAGE Track and the system will guide you through the article submission process. You should have the electronic files listed in the above referenced checklist ready to copy and paste into SAGE Track ([https://mc.manuscriptcentral.com/berd](https://mc.manuscriptcentral.com/berd)).
IMPORTANT: Please check whether you already have an account in the system before trying to create a new one. If you have reviewed or authored for the journal in the past year it is likely that you will have had an account created. For further guidance on submitting your manuscript online please visit ScholarOne Online Help.

ORCID
As part of our commitment to ensuring an ethical, transparent and fair peer review process SAGE is a supporting member of ORCID, the Open Researcher and Contributor ID. ORCID provides a unique and persistent digital identifier that distinguishes researchers from every other researcher, even those who share the same name, and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between researchers and their professional activities, ensuring that their work is recognized.

The collection of ORCID IDs from corresponding authors is now part of the submission process of this journal. If you already have an ORCID ID you will be asked to associate that to your submission during the online submission process. We also strongly encourage all co-authors to link their ORCID ID to their accounts in our online peer review platforms. It takes seconds to do: click the link when prompted, sign into your ORCID account and our systems are automatically updated. Your ORCID ID will become part of your accepted publication’s metadata, making your work attributable to you and only you. Your ORCID ID is published with your article so that fellow researchers reading your work can link to your ORCID profile and from there link to your other publications.

If you do not already have an ORCID ID please follow this link to create one or visit our ORCID homepage to learn more.

INFORMATION REQUIRED FOR COMPLETING YOUR SUBMISSION
You will be asked to provide contact details and academic affiliations for all co-authors via the submission system and identify who is to be the corresponding author. These details must match what appears on your manuscript. The affiliation listed in the manuscript should be the institution where the research was conducted. If an author has moved to a new institution since completing the research, the new affiliation can be included in a manuscript note at the end of the paper. At this stage please ensure you have included all the required statements and declarations and uploaded any additional supplementary files (including reporting guidelines where relevant).

ON ACCEPTANCE AND PUBLICATION
SAGE Production
Your SAGE Production Editor will keep you informed as to your article’s progress throughout the production process. Proofs will be made available to the corresponding author via our editing portal SAGE Edit or by email, and corrections should be made directly or notified to us promptly. Authors are reminded to check their proofs carefully to confirm that all author information, including names, affiliations, sequence and contact details are correct, and that Funding and Conflict of Interest statements, if any, are accurate. Please note that if there are any changes to the author list at this stage all authors will be required to complete and sign a form authorising the change.

Access to your Published Article
SAGE provides the corresponding author with an e-print of their final article.

Online First publication
Online First allows final articles (completed and approved articles awaiting assignment to a future issue) to be published online prior to their inclusion in a journal issue, which
significantly reduces the lead time between submission and publication. Visit the SAGE Journals help page for more details, including how to cite Online First articles.

**Promoting Your Article**

Publication is not the end of the process! You can help disseminate your paper and ensure it is as widely read and cited as possible. The SAGE Author Gateway has numerous resources to help you promote your work. Visit the [Promote Your Article](#) page on the Gateway for tips and advice.
