

OS & SAGE Editorial and Publishing Policies

1. Editorial policies

1.1 Peer review policy

Organization Studies (OS) adheres to a rigorous double-blind reviewing policy in which the identity of both the reviewer and author are always concealed from both parties. To ensure anonymity in the double-blind refereeing process, the author's name should not appear anywhere on the manuscript.

1.2 Authorship

All parties who have made a substantive contribution to the article should be listed as authors. Principal authorship, authorship order, and other publication credits should be based on the relative scientific or professional contributions of the individuals involved, regardless of their status. A student is usually listed as principal author on any multiple-authored publication that substantially derives from the student's dissertation or thesis.

Please see SAGE guidelines on [Prior publication](#) and note that *OS* may accept submissions of papers that have been posted on pre-print servers; please alert the Editorial Office when submitting and include the DOI for the preprint in the designated field in the manuscript submission system. Authors should not post an updated version of their paper on the preprint server while it is being peer reviewed for possible publication in the journal. If the article is accepted for publication, the author may re-use their work according to the journal's author archiving policy.

If your paper is accepted, you must include a link on your preprint to the final version of your paper.

1.3 Acknowledgements

All contributors who do not meet the criteria for authorship should be listed in an Acknowledgements section (information regarding the handling of Acknowledgements in the submission process and in manuscripts accepted for *OS* publication are to be found in the *OS* Manuscript Submission Guidelines). Examples of those who might be acknowledged include a person who provided purely technical help, or a department chair who provided only general support.

1.3.1 Third party submissions

Where an individual who is not listed as an author submits a manuscript on behalf of the author(s), a statement must be included in a Acknowledgements section and in the accompanying cover letter. The statements must:

- Disclose this type of editorial assistance – including the individual's name, company and level of input;
- Identify any entities that paid for this assistance;

- Confirm that the listed authors have authorized the submission of their manuscript via third party and approved any statements or declarations, e.g. conflicting interests, funding, etc.

Where appropriate, SAGE reserves the right to deny consideration to manuscripts submitted by a third party rather than by the authors themselves.

1.4 Funding

OS requires all authors to acknowledge their funding in a consistent fashion under a separate heading. Please visit the SAGE [Funding Acknowledgements](#) page to confirm the format of the acknowledgment text in the event of funding, or state that: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

2. Publishing Policies

2.1 Publication ethics

OS is a member of the **Committee on Publication Ethics (COPE)** and adheres to its [guidelines](#). We encourage authors to refer to the COPE's International Standards for Authors and view the SAGE [Ethics & Responsibility](#) page.

2.1.1 Plagiarism

OS and SAGE take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. We seek to protect the rights of our authors and we always investigate claims of plagiarism or misuse of published articles. Equally, we seek to protect the reputation of the journal against malpractice. All submitted articles are checked with duplication-checking software. Where an article, for example, is found to have plagiarised other work or included third-party copyright material without permission or with insufficient acknowledgement, or where the authorship of the article is contested, we reserve the right to take action including, but not limited to: publishing an erratum or corrigendum (correction); retracting the article (removing it from the journal); taking up the matter with the head of department or dean of the author's institution and/or relevant academic bodies or societies; banning the author from publication in the journal or all SAGE journals; or taking appropriate legal action.

2.2 Journal contributor's publishing agreement

Before publication, SAGE requires the author as the rights holder to sign a **Journal Contributor's Publishing Agreement**. SAGE's Journal Contributor's Publishing Agreement is an exclusive licence agreement which means that the author retains copyright in the work but grants SAGE the sole and exclusive right and licence to publish for the full legal term of copyright. Exceptions may exist where an assignment of copyright is required or preferred by a proprietor other than SAGE. In this case copyright in the work will be assigned from the author to the society. For more information, please visit the SAGE [Contributor Agreement webpage](#).

2.3 Declaration of conflicting interests

Within your Journal Contributor's Publishing Agreement, you will be required to make a certification with respect to a declaration of conflicting interests. OS does not require a declaration of conflicting interests but recommends you review the SAGE [Declaration of Conflicting Interests Policy](#) page.

2.4 SAGE Choice and Open access

OS offers optional open access publishing via the **SAGE Choice** programme. If you or your funder wish your article to be freely available online to non-subscribers immediately upon publication (gold open access), you can opt for it to be included in SAGE Choice, subject to payment of a publication fee. The manuscript submission and peer review procedure is unchanged. On acceptance of your article, you will be asked to let SAGE know directly if you are choosing SAGE Choice. For more information, please visit the [SAGE Choice](#) website

2.5 ORCID

As part of its commitment to ensuring an ethical, transparent and fair peer review process, SAGE is a supporting member of [ORCID, the Open Researcher and Contributor ID](#). ORCID provides a unique and persistent digital identifier that distinguishes researchers from every other researcher, even those who share the same name, and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between researchers and their professional activities, ensuring that their work is recognized. The collection of ORCID IDs from corresponding authors is now part of the submission process of this journal. If you already have an ORCID ID you will be asked to associate that to your submission during the online submission process. We also strongly encourage all co-authors to link their ORCID ID to their accounts in our online peer review platforms. It takes seconds to do: click the link when prompted, sign into your ORCID account and our systems are automatically updated. Your ORCID ID will become part of your accepted publication's metadata, making your work attributable to you and only you. Your ORCID ID is published with your article so that fellow researchers reading your work can link to your ORCID profile and from there link to your other publications.

If you do not already have an ORCID ID please follow this [link](#) to create one or visit our [ORCID homepage](#) to learn more.
